- 98 Percent Post-Consumer Paper Content
- Will Not Split When Nailed
- Sustainable and LEED™ Eligible
- Compatible With Sealants
- No Harmful Additives
- No Asbestos
- 100% Environmental
- Made to Prevent Rot and Fungus
- Termite Protected
- Available in Five Widths
- Available in Up to 10-Foot Lengths

USES AND APPLICATIONS: Homex 300 is a unique light duty forming material and expansion joint. Time tested across the United States and Canada, this all-natural Homasote®-based product is perfect for forming walkways, patios, pool aprons and driveways, and is compatible with sealants, including polymerized sealants.

CONSTRUCTION DETAILS: The basic raw material in Homex 300 is 100% post-consumer wastepaper (with weather and termite-resistant additives). Homex 300 is lightweight, splinter free and easy to cut or shape. It is available in nominal 3/8", 1/2", 3/4" and 1" thickness, in lengths to 10' and widths from 3" to 48" (custom sizes available upon request). Homex 4' x 10' slabs can be fabricated into non-standard size strips or specified curb and gutter configurations.

CODE APPROVALS: Homex 300 Conforms to performance requirements of ASTM D-1751.

ARCHITECTURAL SPECIFICATIONS (SHORT FORM):

Expansion joint filler shall be Homex 300 as manufactured by Homasote Company, West Trenton, New Jersey and installed in strict accordance with Homasote Company current specifications.
