

Portland Type I

Holcim (US) Type I Portland Cement is one of the most widely used basic building materials in the United States, because it is durable, dependable, cost-effective, and suitable for a variety of concrete construction applications.

Manufactured by one of the leading producers of cement and related products in North America, Holcim Type I portland cement is used to construct pavements, sidewalks, reinforced concrete buildings, bridges, railway structures, tanks, reservoirs, culverts, water pipe, and masonry units.

Holcim Type I portland cement is formulated to provide optimum strength characteristics for conventional ready mix requirements, as well as architectural construction where high strength is needed. This product is available as a low alkali portland cement.

Holcim Type I portland cement meets all requirements outlined in ASTM C 150 Standard Specifications for Portland Cement, and can be shipped by bulk, rail or truck, and measured in tons or packaged in our new standard 42 kg (92.6-pound bags).
