

Portland White Type I

Holcim (US) White Portland Cement provides strength, workability, and consistent color for architectural treatments that call for all aesthetic white finishes. To assure consistent color, Holcim White Portland Cement is manufactured under strict quality control conditions.

Made of selected high quality raw materials, Holcim White Portland Cement enhances the effect of terrazzo and monolithic white concrete. Holcim White Portland Cement is suitable for a variety of construction applications, including: precast curtain walls, facing panels, flooring surfaces, stucco, cement paint, tile grout, decorative concrete, and white or colored concrete or mortar.

Like all Holcim cements, Holcim White Portland Cement is formulated to provide optimum durability. This product meets all requirements outlined in ASTM C 150 Standard Specifications for Portland Cement, and can be shipped by bulk, rail or truck, and measured in metric tons or packaged in our new standard 42 kg (92.6-pound bags).
