

TOTALFLASH™

CAVITY-WALL DRAINAGE SYSTEM
by Mortar Net USA, Ltd.

Special Sizes for Restoration
or Remediation Jobs, Too!

With
TOTALFlash™ -
Everyone Wins!

1 5-1/2 ft. Panels of PRE-CUT FLEXIBLE FLASHING*
All main components are factory-assembled onto easy-to-mount flashing panels.

2 Built-In NO-CLOG DRAINAGE MATTE
lets water pass, unobstructed, to Weep Tabs.

3 Built-In TERMINATION BARS
with pre-drilled holes, allow quick, one-man installation.

4 Built-In EDGE DAM
directs moisture out of building.

5 Clearly Specified LAP JOINTS
enforce complete secure coverage.

6 Built-In STAINLESS STEEL DRIP EDGE
releases moisture away from building.

7 Built-In NO-CLOG WEEP TABS
deliver moisture to the outside of the building.

Pre-Formed CORNER BOOTS, STAINLESS STEEL CORNERS & END DAMS
are available, for "perfect" corners every time.

SCREWS & ADHESIVE TUBES INCLUDED
in each box of TOTALFLASH™

**Our Standard Flashing Membrane is an 18-inch, 40-mil polymeric, reinforced, UV stable membrane, incorporating DuPont's Elvaloy® KEE polymer.*

Flashing alone isn't enough to meet today's rigorous moisture-control demands. But until now, higher protection meant higher expenses for time & labor.

TOTALFlash™ changed all that, delivering higher protection with lower costs. But the benefits don't end there:

BUILDERS see quicker completion while lowering the risk of future wall-damage or mold-growth.

MASONS no longer have to order an array of components, then hope everything arrives on time.

- They no longer have to struggle with "field-cutting" awkward flashing-rolls.

- Our new Pre-Formed Corners get them off to a quicker start.

- **TOTALFlash™** high-speed installation lets them start laying brick much sooner.

ARCHITECTS get the coverage they specified. (Our clearly marked Lap Joints make it virtually foolproof!)

OWNERS enjoys greater peace-of-mind and a longer building-life.

TENANTS breathe easier, knowing there's far less chance of moisture-related illness.

IT'S 100 YEARS OF MOISTURE-CONTROL TECHNOLOGY THAT YOU CAN HOLD WITH ONE HAND.

Wondering how anyone could give you twice your usual protection (or more), with half your usual time & labor (or less)? Just see what our masonry experts have managed to build into each handy, 5-1/2-foot panel of premium flashing.

TOTALFLASH™

CAVITY-WALL DRAINAGE SYSTEM
by Mortar Net USA, Ltd.

NOTHING to Cut

The job starts with corners, but you don't have to make them by hand any more. Our flawless, factory-built CornerBoots save you time & trouble.

And of course our new TOTALFlash™ means masons can quit being roofers, because each panel comes pre-cut to a handy, 5-foot length. (See inside.)

NOTHING Faster

TOTALFlash™ can be installed by one worker, at speeds twice as fast as anything else they've used. Half the labor, half the time--it adds up to nice savings all around.

NOTHING Protects Better

For example, even when mortar or grout droppings pile up to the top of the dovetails, water will still escape through TOTALFlash™ layer of no-clog polyester mesh.

The Beauty of Green

Ideally, masonry buildings should last for centuries. Such longevity isn't just a benefit to the building's owner, it's a plus for our whole environment. Demolition wastes the resources that went into the old building, then spends new resources to build its replacement.

TOTALFlash™ guards against the damage trapped moisture can cause to a building's exterior masonry walls, thus helping to prevent costly waste. It also works to suppress the air-quality hazards that can arise in damp wall cavities.

SECOND Chances

It happens that TOTALFlash™ was invented by Tom Sourlis, who restored the masonry of Chicago's famed Water Tower and many other historic landmarks.

Tom made sure to create TOTALFlash™ in sizes that could be easily installed in existing structures, while removing only the normal number of courses.

TOTALFlash™ can give older buildings a new lease on life, while helping to sustain our nation's resources.

The use of TOTALFLASH™ may help your project qualify for LEED credits.
